

KPR Tubes
Steel pipes and tubes

Strength Meets Innovation..
Your Trusted Steel Partner

ABOUT US

Crafting Excellence in Steel for Every Structure!

Founded in 2007 by the visionary Shri Rajesh Kumar Bhalotia, KPR Tubes Manufacturing Company has rapidly emerged as a leader in steel and tube and flat product division.

Our commitment to excellence has propelled us to become a prominent manufacturer of high-quality precision tubes, black steel tubes & pre-galvanized tubes, with a robust plant capacity of 130,000 MT per annum.

We envision a future where our products not only meet but exceed our customer's expectations. We strive to be a one-stop shop for all needs in the tubes and sheet metal, especially for automobile sectors, by providing comprehensive solutions tailored to their specifications.

Transforming from a small-sized to a mid-sized organization has been a remarkable journey. Our growth can be attributed to cutting-edge innovation, strategic business practices, and a modern approach that prioritizes sustainability. We maintain a stringent focus on quality, ensuring that we meet and exceed customer needs at every step of the process.

We take great pride in our world-class manufacturing facilities, which enable us to deliver superior quality products. Our operations extend beyond the steel manufacturing, we also operate a steel processing unit to provide comprehensive services to our clients.

This integration allows us to serve our customers better by offering tailored solutions that enhance their operational efficiency.

Our aim is to bridge the gap between steel manufacturers and consumers, fostering a seamless connection that ensures timely delivery of high-quality products.

We are dedicated to maintaining highest standards of quality and sustainability in our operations, contributing positively to the industry and the environment.

Leading the steel industry since 2007

VISION

SINCE
2007

Vision

To be a global leader in the steel tubes and flat product industry, delivering superior quality and sustainable solutions.

Mission

To provide high-quality steel tubes and flat product with a commitment to excellence, innovation, and sustainability, catering to diverse industries worldwide.

Our Commitment

Quality Excellence

We are unwavering in our commitment to quality. Each product undergoes rigorous testing and quality checks to ensure it meets the highest industry standards. Our aim is to deliver reliable and durable tubes that consistently perform in demanding applications.

Innovation and Technology

We embrace cutting-edge technology and innovative practices to stay ahead of the curve. Our investment in research and development allows us to introduce advanced products and processes that meet evolving market demands.

Safety and Integrity

The safety of our employees and the integrity of our operations are paramount. We adhere to stringent safety protocols and ethical business practices, fostering a culture of accountability and trust.

Customer Satisfaction

Our customers are at the heart of everything we do. We prioritize understanding your unique needs and delivering tailored solutions that enhance your operations. Your feedback drives our continuous improvement efforts.

Sustainability

We are committed to sustainable manufacturing practices that minimize environmental impact. Our operations focus on energy efficiency, waste reduction & responsible sourcing, ensuring a greener future for generations to come.

Community Engagement

We believe in giving back to the communities we serve. Through various initiatives, we support local development and contribute positively to society, promoting well-being and growth.

Experience Leadership: Your Partner in Success

Your Needs, Our Commitment

At KPR tubes, your needs are our top priority. We're committed to addressing any concerns you may have with responsiveness and precision. From the very first conversation to project completion, we work alongside you every step of the way, ensuring clear and continuous communication throughout the process. And, after the deal is done, we remain by your side—our expert sales team is always available to provide the ongoing support you need.

Building Scalable, Long-Term Relationships

Our core philosophy is centered on building lasting relationships, not just completing transactions. We understand that your needs evolve, which is why we maintain a high degree of flexibility to adjust and grow with you. At KPR tubes, we're dedicated to ensuring your satisfaction by adapting to your changing expectations and continuously striving to exceed them.

The Expertise You Can Rely On

With proven processes and industry-leading expertise, we're here to help you navigate the complexities of your supply chain. Our team's in-depth knowledge enables us to reduce risks and enhance your competitive position. By leveraging our market insights and collaborative approach, we provide you with high-quality solutions that give you a distinct advantage in the marketplace.

Global Solutions, Local Application

KPR tubes methodologies have been tested and proven in markets around the world. Regardless of the scope or location of your projects, our teams bring firsthand experience and a deep understanding of both local and global industry dynamics. This allows us to provide the quality products and timely delivery you need to stay ahead of the competition, wherever you are.

Product Strength & Advantages

- 01 KPR Tubes are made from only high quality tested HR coils from major steel producers.
- 02 KPR Tubes are engineered with advanced tensile strength, making them ideal for high-stress applications and ensuring reliable performance over extended periods.
- 03 KPR Tubes are perfectly circular in shape, ensuring better threading and easier tight socket fitting.
- 04 High quality KPR Tubes sockets meet the stringent standards of strength, thread, depth, gauge and finish.
- 05 KPR Tubes conform strictly to National & International specifications regarding diameter control and fin height making them ideal for any structural applications.
- 06 KPR Tubes are treated with a rust-prevention oil coating to protect against corrosion during shipment and storage, ensuring that they reach customers in optimal condition.
- 07 KPR Tubes can withstand pressure several times more than the normal pressure required hence long lasting.
- 08 Each batch of KPR Tubes is meticulously tested for dimensional accuracy and uniformity, providing consistency and ease of installation across projects.
- 09 KPR Tubes always offer superior quality at most competitive prices, thus value for money product.

Product Offerings

High quality Pipes & Tubes

Tubes

Our tubes, manufactured with precision and certified for quality, meet the rigorous demands of various industries.

Precision Tubes

Product Specification

SIZE RANGE	THICKNESS RANGE	LENGTH
90D - 1010D	0.6MM - 4.00MM	3.00MTR - 12.00MTR

Applications

Ideal for high-performance Automotive applications.

Automotive

General Engineering

Bus body

Furniture

Hot Rolled tubes

Coils

Hot Rolled Coils & Sheets

Hot rolled coils and sheets are produced by rolling steel at high temperatures, which allows for easier shaping and forming.

Applications

Sheet Metal Components in Automobile segment

Structural Components in Lifting & Excavation segment

Railway Coaches

Construction Projects

Bicycle Frames

Agricultural Components

Tube Making etc.

Engineering Equipment

Hot Rolled Pickled & Oiled Coils & Sheets

Hot rolled pickled and oiled coils and sheets undergo a post-rolling process where they are cleaned in an acid solution to remove surface oxides, then coated with oil to prevent rust.

Applications

Automobile segment

Strapping

Rack Systems

Various Stampings

Construction

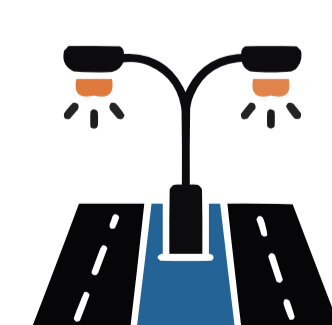

Lawn and Garden Equipment

Structural Sections

Tanks

Light Poles

Gas Cylinders

Cold Rolled Coil & Sheets

Cold rolled coils and sheets are produced by rolling steel at room temperature, resulting in a smoother finish and tighter tolerances compared to hot rolled products.

Applications

Electrical Control Panels

Elevator Panels

Enclosures for Gensets

Light fittings

Bicycle Parts

Agricultural Implements

Fan Blades

Furniture

Galvanized Coils & Sheets

Galvanized coils and sheets are coated with a layer of zinc to provide excellent corrosion resistance.

Applications

Automobile industry

Galvanized Coils & Sheets are used to produce air and oil filters, fuel and oil tanks, exhaust pipes etc.

Appliances industry

Galvanized Coils & Sheets are used to make various components of Air Conditioners, Refrigerators, Washing Machines, Microwave Ovens, Air Coolers, Gas Stoves etc.

Service Offerings

Slitting

Slitting is the process of cutting steel coils received from mills into narrower widths tailored to customer specifications. This process is essential for producing strips that meet the diverse needs of various industries.

Advanced Slitting Lines

At KPR Tubes, our slitting lines are equipped with high-precision slitting machines that provide our customers with a competitive edge in the market. Our state-of-the-art facilities ensure that every strip meets the required dimensions and quality standards. Our slitting lines cater to the demands of automotive, construction, and industrial machinery sectors. We offer size range from 0.4 to 8mm.

Cut to Length (CTL)

Cut to Length (CTL) is the process of uncoiling flat-rolled steel and cutting it into flat rectangular blanks of specified lengths. This process is essential for producing tailored steel products that meet the unique needs of various applications.

Cut to Length (CTL) is a crucial process in the steel industry, where flat-rolled steel is uncoiled and cut into rectangular blanks of specified lengths. This method allows manufacturers to create tailored steel products that fit specific requirements for various applications, enhancing efficiency and reducing waste. By customizing dimensions, CTL ensures that the steel meets the precise needs of industries such as construction, automotive, and manufacturing. The ability to produce these tailored blanks plays a significant role in streamlining production processes and improving overall product quality.

Our best facilities

Tube Cutting to Customized Sizes

Tube cutting is an essential process in tube manufacturing, allowing precise length customization for a wide range of industrial applications such as automotive, construction, and piping systems.

Advantage of Cutting Machine

With in-house cutting machines, including single and double-headed chamfering tools, we ensure reduced waste, superior accuracy, and cost-effective solutions tailored to your specifications.

We offer customizable lengths and chamfering options, ensuring that each cut tube is ready for immediate use in your production line.

Capabilities of our CTL facilities

At KPR Tubes, We have 15 in house tube cutting machines, single headed chamfering machines, double headed chamfering machines and wire brush machines. Our CTL facilities span across India, allowing us to efficiently process steel coils of both narrow and wide widths. This capability enables us to provide a diverse range of lengths tailored to customer specifications, ensuring we meet varying industry demands.

Our precision cuts reduce waste and ensure cost-effective solutions for your production line. No matter your specification, from complex cuts to large volumes, our CTL lines can handle it all with precision.

Our state-of-the-art tube cutting machines use a variety of techniques including rotary cutting, CNC-controlled systems, ensuring precision and consistency across all tube dimensions.

Pickling and Oiling

Hot rolled coils often come with a layer of oxide or scale on their surface, which can affect their appearance and performance. The pickling process effectively cleans these scales, resulting in a smoother and more aesthetically pleasing surface finish.

State-of-the-Art Facility

We have a Pickling and Oiling Plant upto 10mm thickness with a production capacity of 15000MT per month.

Our Pickling & Oiling facility is equipped to produce high-quality Hot Rolled Pickled and Oiled (HRPO) coils. This facility is designed to handle a variety of coil sizes and specifications, ensuring we meet the diverse needs of our customers.

This facility is designed to handle a variety of coil sizes and specifications, ensuring we meet the diverse needs of our customers.

Quality

At KPR Tubes, one of our highest priorities is ensuring superior product quality. We implement stringent quality inspection parameters to guarantee that every product meets our customers' high standards and complies with strict regulatory requirements. To enhance our quality assurance processes, we invest in innovative inspection techniques that reduce inspection times and shorten lead times, allowing us to provide quick turnaround for our customers. Our rigorous quality checks mean fewer product failures, faster approvals, and ultimately, greater reliability in your supply chain.

We pride ourselves on our high-class testing facilities, which play a vital role in maintaining our commitment to superior product quality. Our in-house laboratory is equipped with state-of-the-art technology and staffed by experienced professionals dedicated to rigorous testing and analysis.

We employ a comprehensive suite of testing methods to ensure the highest quality and performance of our products. Our rigorous quality assurance processes include the following key tests,

Hardness Testing

Chemical Testing

NDT Testing

UTM Testing

Inspection and Storage Facilities

At KPR Tubes, we prioritize quality and reliability with our advanced inspection and storage facilities. Each tube undergoes rigorous quality checks to ensure it meets the highest industry standards for structural integrity and surface quality. Our organized storage system protects the tubes from environmental factors, ensuring they are ready for your projects.
